

Clark Forklift Attachment

Clark Forklift Attachments - At present, there are at least 350,000 Clark lift trucks performing worldwide, and upwards of 250,000 operating in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, covers more than 120,000 particular items intended for 20 unique designs of forklifts and automated equipment. Your regional Clark Supplier is your total source for availability of all your parts requirements provided by Clark Totalift.

Clark features a exceptional Parts Distribution team. The components warehouses are conveniently positioned in Changwon, South Korea and Louisville, Kentucky to make certain exceptional service to both their buyers and their dealers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Driven to offer the highest level of value and service to our customers, Clark remains on the leading edge when it comes to improving efficiency and benefiting performance.

Internationally, Clark has one of the most impressive dealer support networks. With over 550 locations worldwide, dealer representation in over 80 nations and 230 locations in North America, their high level of dedication to their clients predominates the materials handling industry.

Clark proudly remains an innovative leader of the industrial equipment industry, pioneering safety features such as the operator restraint system. This exceptional dedication to safety is now a customary feature on every lift truck.

Clark has a continual objective to have the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be internationally certified with quality standard ISO 9001 in all of its production facilities. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any environmental limitations, thus placing them in a prevailing market position.

Clark has selected the structure of "Lean Production" at all of its assembly plants because this technique is extremely economical and allows for minimal use of resources. Established to guarantee maximum proficiency, this system is designed to discover and acknowledge the most efficient ways for manufacturing facility stewardship. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Clark's product engineers and suppliers communicate together to improve the proficiency and brilliance of their merchandise while minimizing expenses. The new value engineering program combines modern product improvement and offers improved client support and service within the industry.
