

Barrel Clamps

Barrel Clamps - A Barrel Clamp is actually a hydraulic or mechanical accessory for a lift truck. It can be utilized in order to grip the item you want to transport using the lift truck and is often used for handling kegs, paper rolls and barrels. Several designs of barrel clamp accessories also have a revolving function. For instance, the rotate function enables a forklift operator to be able to put in a vertically stored paper inside the horizontal intake of a printing press.
