

Aerial Work Platform

Aerial Work Platforms - There are a variety of lift truck attachments offered on the market. They can help transform your lift truck so that you can expand your ability to pick stuff up or finish clean up jobs and material handling with less effort.

Several accessories were specially designed for the forks themselves. For instance, fork extensions are utilized when you require more fork length, that increases lifting capacity. Blade extensions come in lengths varying from 48-120 inches. Triangular or rounded accessories are one more variety utilized if moving rolled material in order to make sure it does not roll off of the traditional flat forks.

Lifting attachments can be pivoting and telescoping crane attachments. They come in numerous styles. These attachments are usually intended for moving lumber, metal bars, poles or whatever kind of bulky objects. Additional accessories like for instance other styles of hooks and hook plates are available in order to carry objects utilizing a chain or sling. Magnetic lifters and slab lifters are other items that can be used with hook accessories. Slab lifters are specialized accessories which are meant for picking up different materials which are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools that attach to your forklift so as to make transferring rolls of carpet a lot easier. The attachment hooks onto the lift truck's blades and has a pole that goes through the center of the carpet roll.

There are many kinds of lift truck accessory used for facility maintenance like for example snow forks. These industrial forks could be connected to front end loaders and meant for moving materials like for instance dirt, and mulch as well as snow. Other popular cleanup attachments include standard sweepers and magnetic sweepers. Standard sweepers includes a broom which the lift truck blades hook onto for sweeping big spaces like for example factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in places where there is lots of metal fragments like on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up effortless and quick.

A material spreader is another lift truck accessory which is normally utilized at facilities. These spreaders are useful for a variety of applications like for example spreading pellets, fertilizers, insecticides, seeds, ice melt and rock salt.

Another optional lifting attachment are work platforms. These could be used by a lot of various companies on a daily basis. Platforms may vary in size from 36" x 36" to up to 60" x 60". A few models may be presented and are capable of folding up and storing into a smaller place. Work platforms are designed to raise workers up to an overhead location with the use of the lift truck. Larger platform units have added space for personnel to bring tools and other necessary items meant for the task. Often work platforms are constructed of poly material or steel.
