

Drum Clamp

Drum Clamp - Forklifts are meant to deal with lifting, storing and moving pallets. For businesses which deal with items in drums, you should utilize an attachment to store, move and lift them. There are several drum forklift accessories which you could acquire for all of your drum lifting needs. These attachments are specifically used to be able to handle drum containers - hence there is no risk of damage to the product or drum container whenever they are moved, lifted or stored.

Drum Positioner And Grab

The drum positioner is offered in three or four tine models. They are utilized for the loading and unloading of drums off racks, vehicles and drum stands. This accessory is completely automatic, thus allowing the one operating it to be able to operate all from the comfort of the forklift seat. Able to move large and extra large plastic drums, steel, its capacity is 210 liters. This particular attachment is utilized for drum pyramid stacking.

The drum grab is fork designed and mounted with the sole purpose of dealing with steel drums which have rolling hoops. Though the reason for the design was to handle steel drums with rolling hoops, the drum grab could accommodate the moving of large and extra large plastic drums. Drum capacity maximum is 210 liters for steel drums with rolling hoops and 220 liters for plastic drums.

The Rotator

The drum rotator is a forklift attachment which mounts on to the forks themselves. The objective of the drum rotator is to be able to pick up the drum and turn it upside down. The drum fits in to the rotator utilizing a steel clamp that fits over the center of the drum. The rotation is performed by either a continuous loop chain or a crank handle. The crank handle is designed for operations which take place below shoulder level. For operations which must take place above shoulder level, the continual circle chain will be utilized.

The drum tines are simple fork or carriage mounted accessories. They are meant for stacking and unstacking 210-liter steel drums. Stacking requires nothing elaborate, just easy horizontal placement of the drums. The carriage-mounted enhancements decrease the load center of the drums.

Automatic Tongs

Drum tongs are available in automatic and semi-automatic units. They are used in the open topped or tight head steel drum styles. The drum pincers could be attached in a few ways to the lift truck. One way is to attach them underneath a fork-mounted hook. One more way is to connect them to a carriage mounted jib or a fork-mounted jib. Both the automatic and semi-automatic have a drum capacity of 210 liters. With the automatic, there is no requirement for the operator to ever leave the seat of the forklift.

Rim Grip Handler

When drums need storage space with inadequate area accessible, the Rim Grip Drum Handler is the ideal alternative in drum forklift attachments. This accessory will work for either the two hundred ten liter drums in addition to one hundred twenty liter drums. The Rim Grip Handler functions by utilizing steel jaws to be able to grab the edge of the drum. It lifts the drum and puts it down without needing any room between all of the drums. The average unit used in the industry is a zinc-plated handler, even if, this particular attachment is accessible in stainless steel for the food and drink industry.
